

## Metric Carded Drill Bits Titanium Coated

Suitable for use in:

**Ferrous Metals:** Mild Steel / Carbon Steel / Stainless Steel / Cast and Wrought Iron

**Non-Ferrous Metals:** Aluminium / Copper / Brass / Alloys

**Timber and Plastics**

Gold Finish Titanium Nitride coating helps to dissipate heat and reduces cold welding.  
It reduces friction by increasing lubricity.

**135° Split Point:** Split Point is self centering and the short distance from the drill axis to the outer corners results in faster penetration, reducing end thrust.  
Faster penetration reduces abrasion and friction along the cutting edges.

\* As with all surface coated tools, performance will deteriorate after resharpening.
