

Driver Bits

Square Drive

Square drive (SQ) fasteners are growing in popularity, specifically in decking screws.

The vertical sidewalls create a positive engagement between fastener and bit virtually eliminating cam-out.

They are strongly magnetised for superior fastener holding.

*See page 2 for IMPACT Square Driver bits.

** Driver bits with a length of 50mm and over have the universal 1/4 hex shank.

The 1/4 hex shank is suitable for use in most power tools, adapters, extensions and quick change holders.

Driver Bits

Square Drive - IMPACT

Impact bits are designed and manufactured for optimum use in not only impact applications but they also offer exceptional performance in standard driving usage.

The impact driver bit is designed to absorb torque peaks created by impact tools.

They are strongly magnetised for superior fastener holding.
