Nutsetters

Standard Nutsetters feature an internal hex socket with a small chamfer to facilitate quick screw engagement.

The chamfer also reduces marking of the head-shoulder junction when using painted hex head screws.

Nutsetters feature a powerful magnet within the internal socket which helps to hold the hex head.

The 1/4 hex shank is suitable for use in most power tools, adapters, extensions and quick change holders.

Driver Bits

High Impact Nutsetters

Impact Nutsetters are designed and manufactured for optimum performance in modern impact driver tools.

High Impact Nutsetters offer significantly increased bit life in impact applications as well as exceptional performance in standard driving usage.

Impact Nutsetters feature a small internal chamfer to facilitate quick screw engagement.
