

Tru Bolt / Wedge Anchor Gr 5.8 Steel

Tru Bolts are preassembled single unit wedge anchors that are used in solid concrete applications. Fixing is achieved by controlled torquing of the nut which in turn draws the tapered section up into the clip. Thereby expanding the clip outward and forcing the trubolt against the sidewall of the pre-drilled hole.

Applications: Hand and guide rail fastening / Formwork support fastening / Facade installation
 Mechanical, Electrical and Pipe bracket fixing / Stadium seating.

Used by: Electricians / Mechanical service installers / Steel fabricators
 Air conditioning, Heating and Ventilation installers (HVAC) / Racking and Material handling installers.

Features: Suitable for light to medium duty loads / Immediate loading is possible
 Quick and easy to install
